JUNE 15 - JULY 12

Students will:

- live in a Purépecha community
- work with professors from cultural, archaeology and biological anthropology
- use GIS to integrate cultural data and spatial information
- learn how to map archaeological and community sites using GPS and a total station
- work with community representatives to preserve cultural heritage
- participate in a long-term research project about the origins and cultural history of the Purépecha people

Anthropology Summer Field School in collaboration with Central Washington University and the Universidad Intercultural Indígena de Michoacán
